The Most Favored Customer (MFC) and Basis of Award (BOA) remains/is hereby reestablished as: State and Local Governments. The basic discount accepted for the Government is 2%. The price/discount relationship between the Government and the MFC will never be less favorable to the Government than at the time of award. For the life of the contract, the Government's basic discount will never be less than 2% and will always be 2% greater than the 0% basic discount granted to the MFC which is State and Local Governments. Shipping terms are established as Destination for the products referenced above.

The Industrial Funding Fee is a separate collection mechanism. The GSA contract price (price paid by customers ordering from the GSA Schedule), will be calculated by applying the prevailing IFF rate to the net discounted price. The IFF rate is currently 0.75%. (For calculation of the GSA Schedule price (price paid by customers ordering from the GSA Schedule, and the price to be loaded in to GSA Advantage), the final Schedule contract award price is calculated as follows: Negotiated price divided by (1 minus the IFF rate). If the IFF rate is 0.75%, then $1 - 0.75\% = 1 - 0.0075 = 0.9925$. The Schedule contract award price is calculated as the negotiated price divided by 0.9925.
